A DISNEY NEIGHBORHOOD DESIGN EXERCISE

Sheet Numbers: A, B, C, D, E, F + 1 - 14

HISTORY

When Disneyland® Park opened its gates in 1955, it was Walt Disney’s intention that families would leave behind their worries and step into a magical world. This park would be a place they could enjoy together. Disneyland is divided into unique lands of fantasy, adventure, the future, and more. Distinctive architecture and landscapes set the stage for a more immersive and delightful guest experience. Disneyland is a place that people, young and old and from all walks of life, have come to know as the Happiest Place on Earth.

OVERVIEW

This special Disney Paper Parks edition will let you practice the process landscape architects go through to plan and design a neighborhood. You will dream up and create your own special neighborhood where Mickey, Minnie and some of their favorite pals live and play.

Neighborhoods may be defined by physical boundaries, like streets or hills or rivers. Neighborhoods may be where people live, work, gather and interact with one another. Often they share the same interests and activities that bring them together as neighbors and members of the community. Think about where you live. What are the boundaries of your neighborhood? Is there a school or library? Do you have a favorite place to go? That little park where you know you will find your buddies playing? Now get ready to design an awesome neighborhood so you can gather all your friends and loved ones for Mickey and Minnie’s neighborhood block party.

MATERIALS

Glue

Scissors

Crayons

GUIDE

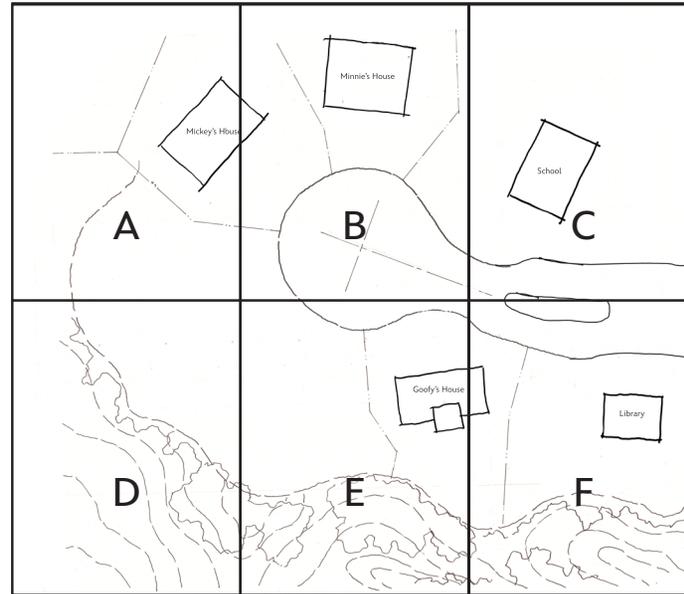

Lines

- Valley fold, fold in front
- - - - - Mountain fold, fold behind
- Cut
- X-ray or guide line.

Please Note: When cutting with scissors and working with any of the materials listed above, adult participation and supervision is recommended.

INSTRUCTIONS

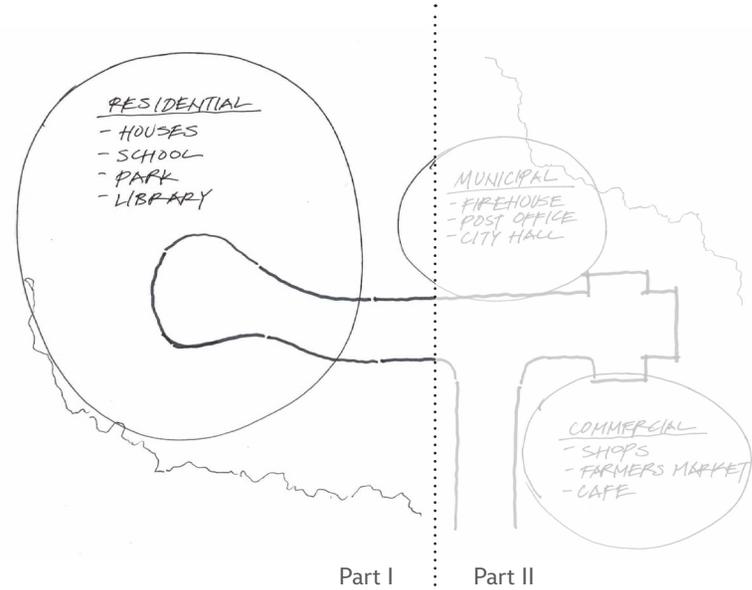

1. Lay out the plan sheets (A through F) as shown. You can use tape on the backside to keep the sheets together.
2. Your design exercise is to create a layout of a neighborhood around the cul-de-sac.
3. Use a pencil to sketch out ideas for your neighborhood. Look at what items you would like to add to the plan. Perhaps a flower bed, a vegetable garden, or some details in the pathways, a track field or just some nice green lawn.
4. Next use the pencil to sketch out where you would like to place the dimensional elements such as hedges, shrubs, and trees.
5. Color all the plan sheets, site furnishings, plants, including all the dimensional items that you will be cutting and gluing in the next step.
6. Finally once everything is colored, use a scissor and carefully follow the outline of each item so you can cut them out, fold, and glue where indicated. Try to loosely set the pieces together so you can see which parts glue together. Set them in the locations where you had sketched out earlier on the plan.
7. Congratulations! Now you have completed the Building a Disney Neighborhood edition of Disney Paper Parks!

ELEMENTS OF LANDSCAPE DESIGN

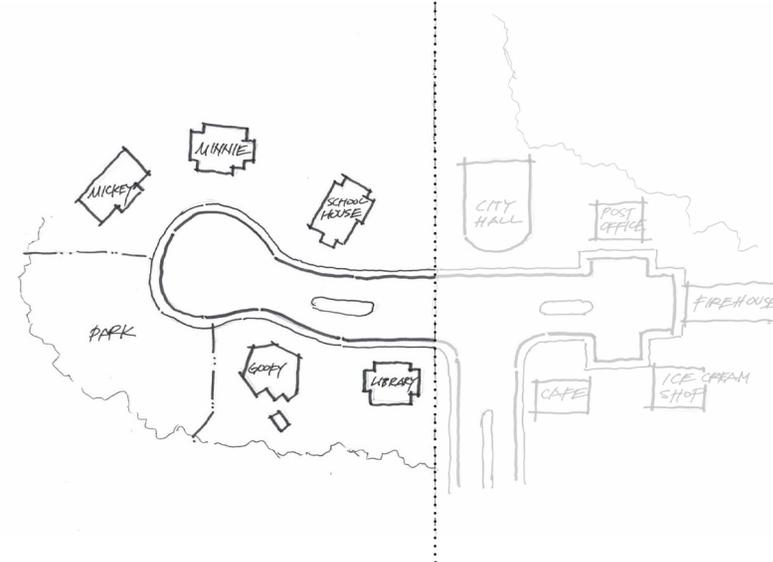

1. DISTRICTS

Districts are places that may share similar purpose that could be part of a neighborhood. Given the different types of buildings and their purpose, feel free to keep them in bubbles along the existing road so you can separate them into the specific locations later. Think about your own neighborhood, is there an Arts District, Shopping District or a post office that's not too far from the fire station? You can group them together because they are all related based on their functions and how they play a part in your community.

2. BOUNDARIES & EDGES

Next it is time to sketch out the placement of each building within each group that you planned out earlier. Make sure each building relates to each other within the neighborhood so people in the community can easily get to them. It is also important to connect each building with different types of pathways and add fences or hedges so each house or building has their own unique space.

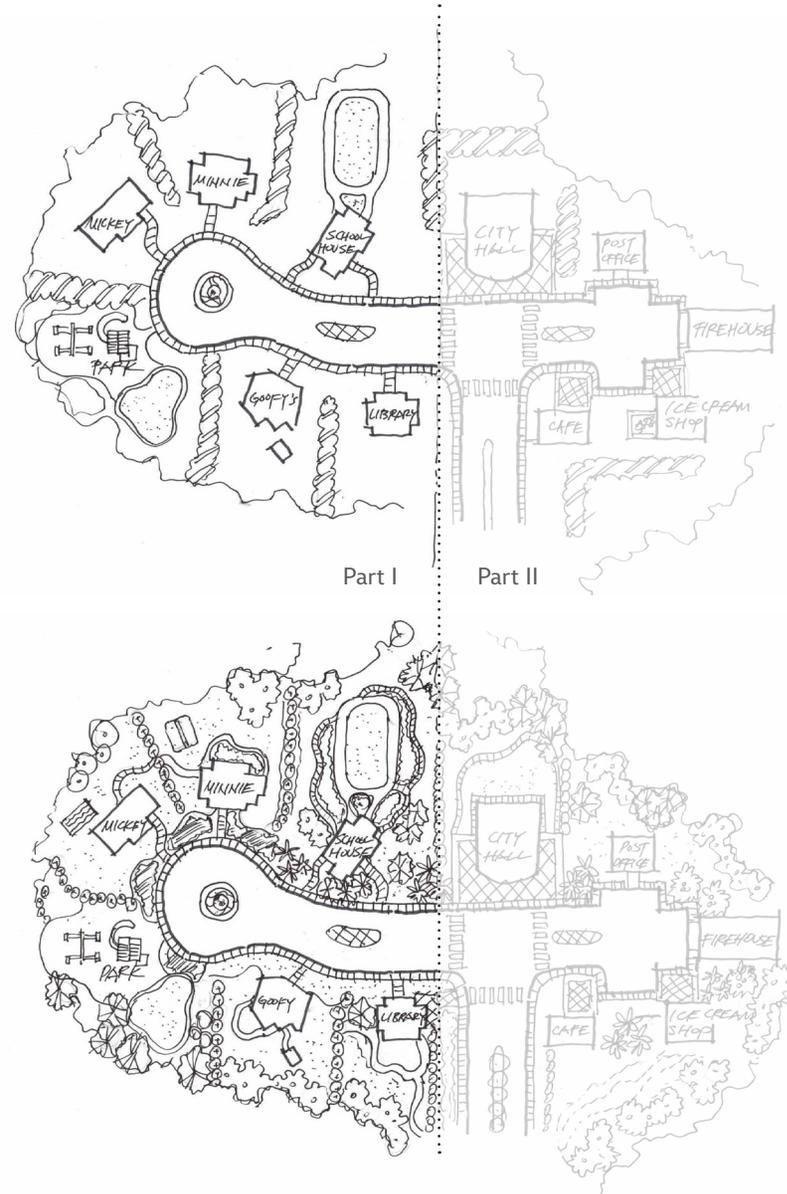

ELEMENTS OF LANDSCAPE DESIGN

3. SITE FURNISHINGS

Now is time to further define and beautify the neighborhood with interesting and fun things to make them unique and special. What might the front yards for each house look like? Maybe a nice water feature can be placed in a plaza or in front of the library for people to gather and enjoy. How about an awesome bounce house for the block party? We can't miss the ice cream or the food stand on the corner of the street to keep everyone's tummy full. All these are features that make a neighborhood alive and a block party fun!

4. PLANTINGS

Finally a neighborhood is not complete without landscape to soften the streets and provide much needed shade on hot sunny days. Perhaps you want to align the streets with a row of trees to further define the sidewalk. How about colorful flower beds around the schoolhouse and around the park to keep them looking cool? Carefully cut out each type of plantings and place them in groups or cluster them where you think that need them the most.

INSTRUCTIONS

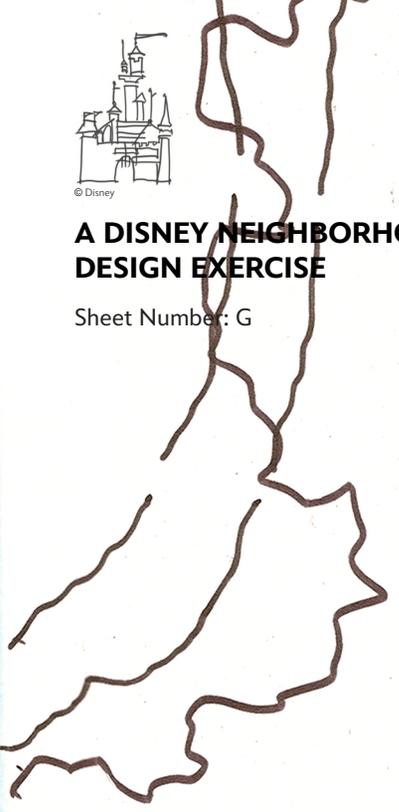

1. Lay out the plan pages (A through J) as shown.
2. Your design exercise is to create a layout of a neighborhood along the given Street.
3. Use a pencil to sketch out ideas for your neighborhood. Group the houses, buildings and draw their outline on the paper.
4. Once all the houses and buildings are drawn in the plan, look at what other items you would like to add to the plan. Perhaps a flower bed, a vegetable garden, or some details in the pathways, a sports court, a track field or just some nice green lawn.
5. Next use the pencil to sketch out where you would like to place the dimensional elements such as hedges, shrubs, a jumping house, an ice cream stand, mailbox, fountain, balloons and people.
6. Now it is time to color all the plan sheets, site furnishings, and plants, including all the dimensional items that you will be cutting and gluing in the next step.
7. Finally once everything is colored, use a scissor and carefully follow the outline of each item so you can cut them out and apply glue to the blank tables and set them in the locations where you had sketched out earlier on the plan. Congratulations! Your neighborhood design is now complete!
