Founded in 1899, the American Society of Landscape Architects is the national professional association for landscape architects, representing roughly 16,000 members in 48 professional chapters, 76 student chapters, and six student affiliate chapters. The Society’s mission is to lead, to educate, and to participate in the careful stewardship, wise planning, and artful design of our cultural and natural environments. Members of the Society use the “ASLA” suffix after their names to denote membership and their commitment to the highest ethical standards of the profession.

ASLA began with 11 founding members:

Nathan Barrett
Beatrix Jones Farrand
Daniel W. Langton
Charles N. Lowrie
Warren H. Manning
Frederick Law Olmsted, Jr.
John Charles Olmsted
Samuel Parsons, Jr.
George F. Pentecost, Jr.
Ossian Cole Simonds
Downing Vaux (son of Calvert Vaux)

At year-end 2011, ASLA reported 15,428 members and 48 chapters representing all 50 states, U.S. territories, and 62 countries around the world.

- Landscape architects held about 21,600 jobs in 2010, according to the U.S. Department of Labor’s Bureau of Labor Statistics, of which 47 percent were employed in the architectural, engineering, and related services industries.
- Approximately 16,000 landscape architects are licensed. Licensure is required in all 50 states to be identified as a “landscape architect” and in 47 states to practice landscape architecture.
- In 2011, 5,136 ASLA members worked at landscape architecture firms; 2,959 worked at architecture, engineering, or multi-disciplinary firms; and 956 were employed by design-build firms. A total of 1,119 members worked for federal, state, or local government.
There are two undergraduate professional degrees. These usually require four or five years of study in design, construction techniques, art, history, and natural and social sciences:

- Bachelor of Landscape Architecture (BLA)
- Bachelor of Science in Landscape Architecture (BSLA).

There are two types of accredited graduate-degree programs:

- The three-year Master of Landscape Architecture (MLA) option is for those who hold an undergraduate degree in a field other than landscape architecture and intend to become landscape architecture practitioners.
- A five or five-plus year Master of Landscape Architecture (MLA) is for persons who do not have an undergraduate degree.

Other, non-accredited programs are also offered, such as the MA/MS in Landscape Architecture for persons who want to conduct research in landscape architecture but do not seek to be registered professionals, programs by schools that are candidates for accreditation, and certificate programs.

“LAAB is a specialized agency that accredits educational programs leading to first professional degrees at the bachelor’s and master’s levels.

Cities (and the administrations that lead them) are now expected to develop projects that support sustainable urbanism, leaving landscape architects well-positioned to shape that process.”

ArchNewsNow, October 2012

There are two different types of licensure laws:

- States with practice acts (47) require a license to practice landscape architecture.
- States with title acts (3) allow anyone to practice landscape architecture, regardless of their qualifications, but only those with a license may use the title “landscape architect” or advertise for “landscape architectural” services.

Each state sets its own requirements for licensure, but all require candidates to pass the Landscape Architect Registration Examination, or LARE.

Landscape architects are licensed in all 50 states, but not yet in the District of Columbia.
