Each year, shark fans work themselves into a frenzy during Shark Week and Shark Fest. ASLA Career Discovery invites you to discover how landscape architects open up the underwater world, with an in-depth look at these jaw-dropping aquariums designed by our members.

**Landscape Architects Take a Bite Out of the Design Profession**

Landscape architects play an important role in designing aquariums around the world. Here are a few examples of ways landscape architects, including ASLA members, are building one-of-a-kind aquariums and aquatic gardenscapes.

**National Aquarium in Baltimore, Maryland**

*Urban Aquatic Health: Integrating New Technologies and Resiliency into Floating Wetlands, Baltimore; Client: National Aquarium, 2018 ASLA Professional Honor Award, Research*

The National Aquarium in Baltimore, Maryland, sits on a typical postindustrial urban waterfront. Its unique position as a global actor and habitat expert makes it well positioned to be an agent of change for urban water quality. With an ultimate goal of transforming its campus into a living lab, the aquarium teamed with designers, engineers, and researchers to investigate new technologies to produce a sustainable and high-performing floating wetland.

Ocean Wonders: Sharks!
Ocean Wonders: Sharks! at New York Aquarium, Coney Island
Firm: MIG | Portico; Margie Ruddick
Marking a comeback after the devastation of Hurricane Sandy, the New York Aquarium triumphantly opened its newest exhibit in the summer of 2018. This state-of-the-art exhibit features sharks from around the world with a focus on the wildlife that inhabits the waters near New York City. With its location on the beach at Coney Island, and its work to practice conservation locally, the New York Aquarium has an interesting role connecting people to wildlife.

Phillip and Patricia Frost Museum of Science
Firm: ArquitectonicaGEO
In collaboration with Grimshaw Architects, ArquitectonicaGEO was hired as the landscape architect for the Frost Science Museum site. The museum and its adjacent sculpture park occupy a 2.5-acre site on Biscayne Bay in Miami, Florida. Construction began in 2013 and was completed in the summer of 2017.

Seattle Central Seawall Project
Central Seawall Project 2017 ASLA PROFESSIONAL AWARDS
Seattle’s Central Seawall Project replaced 3,700 linear feet of derelict seawall with a new state-of-the-art, seismic-resistant seawall that is seamlessly integrated with an unprecedented salmon migration corridor, an enhanced tidal marine environment, and an updated pedestrian promenade. The Central Seawall Project is a massive urban infrastructure project that addresses current issues of sea-level rise, ecology, and aquatic habitat rehabilitation while in the center of a large port city.

Steinhart Aquarium
California Academy of Sciences, San Francisco Steinhart Aquarium, 2009 ASLA Professional Honor Award, General Design
Since 1923, the Steinhart Aquarium has developed a colorful history of firsts. From becoming the first public aquarium to display flashlight fish and coconut octopuses to advancing exploration of the ocean’s mysterious “twilight zone,” innovation and scientific excellence are in our DNA. Today, Steinhart Aquarium continues to shape the role that modern aquariums play in educating and inspiring the public about the biodiversity and sustainability of our oceans and rain forests.
