

Landscape Architect/Urban Designer: 3-8 years of experience

Livable Cities Studio is an emerging design studio based in downtown Denver focused on addressing the needs of the rapidly changing urban environment in our cities. Our work focuses on people and design with a social and environmental purpose that emphasizes the new and expanded role of public infrastructure as city-shaping agent while promoting the public realm in creating livable cities. We are a women-owned emerging practice with a creative culture that is highly collaborative and promotes diversity and flexibility in the workplace. We are looking for creative and highly motivated individuals to join our team and help shape the future of our cities in a fun and stimulating environment.

Livable Cities Studio is looking for a full-time landscape designer/landscape architect and project manager with **3-8 years of experience** to join the Denver team on a variety of urban design and landscape architecture projects focused on planning and design of large-scale infrastructure, major redevelopments, streetscapes, parks and open space. Their primary responsibility will be to work with the office on all components of the projects, including design oversight, graphic production, 3D visualization, client interaction, technical expertise, and development of project content. Versatility and willingness to be flexible and take on a variety of tasks is essential.

Our ideal applicant would be high energy, organized, collaborative and outgoing with excellent writing, design and visualization skills and some combination of experience with urban planning, urban design, landscape architecture or architecture. Responsibilities will include creating high quality design and planning concepts and graphics; 3D visualization; identifying and developing planning frameworks; developing design recommendations; technical design development; management of design and planning projects; client meetings; and participation in community meetings and community engagement activities.

Required skills must include:

- Exceptional level of design expertise and proficiency in developing design content in the areas of large-scale infrastructure and public realm projects.
- Previous experience working on projects that emphasize the role of new forms of infrastructure as city-shaping elements.
- Strong technical and design skills with demonstrated experience of executed project work and/or implementation. Experience with construction documentation is required.
- Desire to work in collaborative teams and previous experience leading collaborative design and planning efforts
- Previous experience with applied green street design and/or sustainable infrastructure design and technical knowledge of implemented green infrastructure systems
- Exceptional skills in GIS, Adobe Creative Suite, AutoCAD, Sketch-Up and 3D applications

Applicants should have a minimum of a Bachelor's degree in Landscape Architecture, Urban Design, Urban Planning or an equivalent degree. A minimum of 3 years working in an office environment is required. Minorities and Spanish speakers are strongly encouraged to apply.

Please send a cover letter, resume, work samples and one work reference to mwenskoski@livablecitiesstudio.com. Position open until filled. No phone calls, please.
