

Architerra Design Group is a successful Landscape Architecture firm located in the Inland Empire. For over 25 years, we have defined our mission by providing attentive customer service and forward thinking design excellence. Current projects include a diverse blend of public agency, commercial and private development design clients, to whom we provide planning and construction document services, throughout Southern California.

Currently we have several positions open in our Rancho Cucamonga office. We are seeking passionate and creative individuals who know how to make complex designs a reality. We offer a well-appointed, contemporary work environment with ample opportunities for professional growth and development. Our recent system wide computer upgrade insures that you will have the latest digital tools to realize your vision and designs.

We invite all qualified professionals to apply. We offer a unique 'family' like work environment, with a competitive salary, health insurance and benefits package. Our offices are conveniently located with easy access to the 210, 15 and 10 freeways, as well as the LA/San Bernardino MetroLink line.

Project Manager:

We are seeking a talented, self-motivated and creative Landscape Architect Project Manager with a minimum of 3 to 5 years of progressive experience, leading the development and planning process of diverse projects as well as the ability to supervise landscape designers to their fullest potential.

The ideal candidate will have the ability to develop conceptual design graphics, along with producing and supervising the CAD process for landscape construction documents including planting plans, construction details, and irrigation plans for a wide scope of residential, community and public agency projects. The Project Manager should have strong problem solving and project management skills.

The ideal candidate must be enthusiastic, understand the design process, and be a solid team player. It is also important that the candidate understand the unique Southern California environment and possess a strong working knowledge of native and climate appropriate plants. Licensure in California is a plus. Candidates should have strong communication skills and must be comfortable presenting design solutions to various public and private stakeholders.

Software proficiency should include AutoCAD, Land F/X and MS Office along with other applications used commonly in a professional landscape architecture firm.

Education Requirements:

Landscape Architecture Degree from an accredited university.

Career Level:

Experienced, some supervisory experience required.
