

JENICK STUDIO is seeking an entry to mid-level landscape designer ideally with 1-5 years of experience. We are a small, growing landscape architecture firm located in Sandwich, Massachusetts. Our firm is team-oriented and casual in a fast-paced environment.

Our work currently focuses on custom residential design and ecological restoration projects, mostly located on Cape Cod. A landscape designer can expect to gain valuable design and production experience as well as field experience through landscape construction and ecological restoration projects. The right candidate is a highly-motivated individual that is excited by the natural environment, shares a passion for contemporary design, and is seeking an atmosphere that supports professional growth. This person must also be a team player interested and committed to helping grow and evolve the firm.

Qualified candidates will assist project managers in developing and resolving design concepts, as well as preparing construction documents, design presentations, and ecological restoration documents for permitting. This individual would be expected to grow into a project management and construction observation role.

Requirements:

- Accredited Bachelor or Master's degree in Landscape Architecture
- Proficient in AutoCAD
- Proficient in Adobe Photoshop and InDesign (SketchUp is a plus)
- Strong hand drawings skills are preferred
- Strong written and verbal communication skills
- Ability to work with interdisciplinary teams
- Technical writing skills are a plus

We offer a full range of benefits including health insurance, a competitive salary based on experience and qualifications, paid vacation and holidays, sick time, and are adding a retirement plan in 2017. In addition, we support professional development and have growth and reward opportunities for motivated individuals.

Please send digital copies of letter of interest, resume, references, and work samples to design@jenickstudio.com
