

**LANDSCAPE ARCHITECT / LANDSCAPE DESIGNER**  
**JBI Partners, Inc**  
**16301 Quorum Drive Addison, Texas 75001**

JBI Partners, Inc, a multidisciplinary land development firm is searching for a creative, talented, and motivated Landscape Architect / Designer with experience in urban planning and neighborhood design. JBI a well-respected firm, located in Addison, Texas has been serving the DFW Metroplex since 1982. Please learn more about JBI Partners, Inc. by visiting our web site at [www.jbipartners.com](http://www.jbipartners.com)

Our planning and landscape architectural projects generally consist of site specific planning and landscape design for single family residential developments, amenity design including entrance feature, monumentation, and open spaces as well as Municipal Park projects. This position will work with the all of the firm's professionals, including Planners, Engineers and Land Surveyors.

The successful candidate will be energetic, willing to learn, be a good listener, have a professional demeanor with a constructive and positive attitude and be able to thrive in a team environment. They will also enjoy problem solving, and have the ability to take ownership in the tasks assigned.

Please apply by sending a portfolio of work including examples of hand graphics along with a resume to [careers@jbipartners.com](mailto:careers@jbipartners.com).

**Qualifications and Responsibilities:**

- 1-3 years of experience. May consider recent graduates.
- Show development of design skills including landscape design and land planning.
- Should have outstanding skills in free hand graphics.
- Be able to create presentation graphics.
- Demonstrate strong interpersonal skills including the ability to interact with designers, engineers, clients, and city government staff in a friendly, responsive and professional manner.
- Have experience and be willing to contribute in the preparation of construction drawings.
- Be able to research local codes and ordinances, prepare property boundary and topography base maps, and use these resources in developing creative, efficient and permit able designs for a wide variety of single family residential projects.
- Should be proficient in AutoCAD and Photoshop.

**Education Requirements:** An undergraduate degree in Landscape Architecture is the minimum educational requirement.
