

Haygood & Associates (H&A) is an award-winning landscape architecture firm specializing in highways, light rail facilities and municipal streetscapes. H&A values excellence in design + product + performance + client satisfaction. Services include landscape architecture conceptual designs, PS&E construction documents and construction support services for landscape and hardscape features. H&A designs the aesthetic features for highway bridges, retaining walls, soundwalls and gateways. In the environmental sector, the company provides visual resources surveys and visual impact technical reports.

H&A is seeking an experienced production associate with a minimum of 6 years of recent experience working in Microstation and with transportation corridor projects. The candidate must be proficient in the full versions of Microstation and AutoCAD as well as MSWord and Excel. In addition to working drawing production, the candidate must be able to assist with Caltrans format specifications and proposal production. The salary is commensurate with experience. Health and retirement plans are included.

Email your resume and a PDF file completed in Microstation of construction documents for one highway project that is representative of your production work.
