

## Landscape Architect - Project Manager

### About O'Dell Engineering:

O'Dell Engineering is a multi-discipline engineering firm with offices in Modesto, Fresno, Pleasanton, and Palo Alto. O'Dell Engineering has four internal divisions: civil engineering, land surveying, landscape architecture, and land use entitlement & land planning. These divisions work together in a collaborative environment to produce high-quality deliverables to public and private clients.

We believe that our success is a direct result of our skilled and motivated staff. Our "Employee First" philosophy has created a rewarding work environment and attracts the best and brightest in the industry. Not only do we offer competitive salaries and benefit packages, we provide extensive training programs in-house as well as through outside sources. If you desire to advance your career while working in a rewarding environment, O'Dell Engineering is the place for you!

### About the Landscape Architecture Department:

O'Dell Engineering's landscape architecture department is a tight-knit, collaborative, and high-energy group of professionals. The team possesses a passion for forwarding the value of citizen's rights to the social and physical opportunities that landscapes, park facilities, and play areas present. Every project the team completes is focused on positively impacting the community through innovative, sustainable, and inclusive design principles.

Most projects are located within northern California. Current design projects include design and development of parks, playgrounds, recreational spaces, commercial campuses, healthcare facilities, public right-of-way landscapes and more. To see some of our project experience, please visit the projects page of our website.

### Position Requirements:

Qualified candidates should be proficient with Microsoft Office programs, specifically Excel and Word, AutoCAD, Adobe InDesign, Photoshop, Illustrator, and Sketchup. Experience with Land F/X is preferred. **A Bachelor's Degree from an accredited landscape architecture program, a minimum of 8-10 years of experience in the industry, and landscape architecture licensure is required.**

### Position Description:

A Landscape Architect - Project Manager is responsible for oversight and scheduling of all aspects of work within a project team including review of work at all project stages, coordination with discipline leaders, and management of project activities. Effective communication with clients, sub-consultants, and local & state regulatory agencies is required. The successful candidate will work in collaborative and integrated teams of professionals that include civil engineers, architects, land surveyors, planners, and environmental specialists.

The successful candidate will:

- Maintain a constructive environment that continually develops directly supervised personnel in a career-orientated way.
- Develop area operating guidelines within a sphere of supervision.
- Assist with staffing decisions.
- Make recommendations when reasonable variations from budget are warranted.
- Provide insightful and enthusiastic leadership that generally creates positive attitudes and builds supportive morale.
- Maintain open communication and a harmonious work relationship with all personnel.
- Keep the Director of Landscape Architecture informed of job progress, client needs, and other issues that may arise in the course of a job.
- Delegate duties which occasionally may be required to meet a deadline.
- Develop procedures to make communication more effective and improve profitability.
- Establish and maintain all external relationships in a manner that is consistent with company objectives.

**Compensation:**

Compensation for the position is based on education, knowledge, skills, attitude, and experience.

**Location:**

This position may be staffed from our Modesto, Fresno, or Pleasanton office.
