EMPLOYMENT

COMMUNITY DESIGN + ARCHITECTURE

Urban Designer, 2015-present

Downtown Berkeley BART Plaza Improvement Project:

Supported the development of the final design solutions for the plaza, bring set from progress construction documentation set to a submission set. Work with other subs to manage project, research and draft details.

US EPA "Making a Visible Difference in Communities" Program:

Bruce Street Green and Complete Street

Developed and illustrated concept street alternatives and options for the Bruce Street corridor in Las Vegas, NV. Worked with the EPA, City of Las Vegas, and other agencies in leading a 3-day charrette. Facilitate focus group and public open house presentations and materials, gather and incorporate feedback from community members and key stakeholders. Drafted and prepared final illustration booklets, PowerPoints, layouts and final reports.

San Mateo Countywide Water Pollution Prevention Program:

Assist in developing a model Green Infrastructure Plan which includes complete and green street and green infrastructure guidelines, standard details, and specifications. Create and edit model text to update countywide agency documents to include and address Green Infrastructure. Aid in effort to assist agencies of the San Mateo City/County Association of Governments to develop and implement green infrastructure to meet water quality targets required by the National Pollutant Discharge Elimination System (NPDES) Municipal Regional Permit.

City of Tucson, Broadway Corridor Landscape Plans:

Aid in design and construction documentation for 35% CD set, including planting plan, sections, and details. Research and select site specific and appropriate plants, investigate best areas to incorporate green infrastructure and rainwater harvesting areas, help design curb ramps and pedestrian for accessibility along corridor.

LEED® for Neighborhood Development (LEED-ND) Certification Review

Part of team that manages and coordinates review of development projects that have applied for certification under the U.S. Green Building Council's LEED for Neighborhood Development rating system. A joint project of USGBC, the CNU, and the NRDC, LEED-ND integrates the principles of smart growth, New Urbanism, and green building into the first national standard for neighborhood design.

Landscape Architectural Intern, 2006/2007

Aid in CAD drafting needs of project managers, rendering, company operations.

RESEARCH

The San Francisco Bay Oystertecture Project

In a joint effort with The Watershed Project, in Richmond, CA, I have been doing research on native oyster populations in the San Francisco Bay. Combining my passion for the water and fisheries, and my experience as a landscape architect, I am building houses for native oyster populations in the San Francisco Bay. I have placed five oyster structures throughout the Bay, in the hopes of providing attractive and appropriate habitat for native oysters. My long term goal is to not only research and develop successful habitat, but also to provide community outreach and learning opportunities for the general public.
